

## Software Release Date for Snow Leopard (Apple Mac OS X 10.6)

**Model: W8400, W8400Dye, W6400, iPF500, iPF600, iPF700, iPF5000, iPF8000, iPF9000, iPF510, iPF605, iPF710, iPF720, iPF810, iPF820, iPF6000S, iPF8000S, iPF9000S, iPF5100, iPF6100, iPF6200, iPF8100, iPF9100, iPF650, iPF655, iPF750, iPF755**

Note: This document is intended to inform end users of the release of date of updated driver software that is compatible with Snow Leopard Mac OS 10.6.

Apple has released Snow Leopard (Mac OS X 10.6) on August 28, 2009. Consequently Canon is releasing updated software to work with the Snow Leopard for iPF series, as well as W series of imagePROGRAF large format printers. Please note that Snow Leopard is not compatible with current (as of August 2009) Leopard compatible drivers, and all imagePROGRAF users of Snow Leopard must upgrade to Snow Leopard compatible versions of imagePROGRAF printer driver in order to print.

### Compatibility with Snow Leopard

Apple has significantly modified the printing architecture, and since Snow Leopard is based on 64-bit, current Leopard compatible drivers do not work with Snow Leopard. Upgrading to Snow Leopard using non-Snow Leopard compatible driver will result in not being able to print to imagePROGRAF printers.

### Snow Leopard Compatible Driver Release Date

The following dates indicated in the chart are the date Canon will post the Snow Leopard compatible drivers on the download page of the website ([www.usa.canon.com/imageprograf](http://www.usa.canon.com/imageprograf)).

Model	Release Date (on web server)
iPF5100, iPF6100, iPF6200, iPF8100, iPF9100	October 7, 2009
iPF5000, iPF8000, iPF9000	October 9, 2009
iPF500, iPF600, iPF700	October 9, 2009
iPF6000S, iPF8000S, iPF9000S	October 14, 2009
iPF650, iPF655, iPF750, iPF755	October 17, 2009
iPF510, iPF605, iPF610, iPF710, iPF720, iPF810, iPF820	October 21, 2009
W6400, W8400, W8400D	November 12, 2009
